### **H.J. Baker's Tiger-Sul Products Continues Expansion of Atmore, AL Sulphur Facility with Improved Rail Tank Car Unloading System**

#### **Improved Molten Sulphur Unloading System to Help Meet Increased Sulphur Demand at Tiger-Sul's Atmore, Alabama Facility**

WESTPORT, Conn., U.S.A. – (July 14, 2014) – H.J. Baker's Tiger-Sul Products announced that to improve their handling and logistical position and to better serve their customers they have developed and built a new molten sulphur unloading system which increases capacity on the dedicated rail spur at their sulphur facility in Atmore, Alabama.

The employee designed initiative built a molten sulphur unloading manifold system the length of the spur, which allows for: increased capacity, increased safety and decreased service time of the rail cars. This, in addition to the recent installation of a 1,500 ton molten sulphur storage tank and heating pumping system dramatically increases the production efficiency of the Atmore facility.

Don Cherry, President of H.J. Baker's Fertilizer Group said: "We have seen a dramatic increase in demand for our sulphur bentonite fertilizer products in the domestic southeast, especially Florida. As the sulphur market grows, we want to ensure we are able to meet current customer needs and that we are in the best possible position to meet the needs of our customers in the future. The added capacity on the rail spur is another example of our continued commitment to deliver outstanding products and superior customer service."

The upgrades to the Atmore facility are in addition to H.J. Baker's recent announcement of Tiger-Sul Products (Canada) Co.'s purchase on its Irricana, Alberta, Canada sulphur plant. The Irricana plant will allow for increased production of sulphur bentonite fertilizer and showcase the innovative work H.J. Baker's Tiger-Sul Products is doing.

H.J. Baker has been a global manufacturer and supplier of agricultural goods and services for 164 years. H.J. Baker has built relationships that last decades, and continues to invest in innovative products, the environment and the community. The company's strategically located processing plants, offices and warehouses create a super-efficient pipeline for the vital commodities and products that it sources, manufactures and markets. H.J. Baker is headquartered in Westport, Connecticut, U.S.

Tiger-Sul Products (Canada) Co. is a wholly-owned subsidiary of H.J. Baker & Bro., Inc. Tiger-Sul Products is a global leader in Sulphur Bentonite, Sulphur Bentonite Micronutrients technology, and other well-established fertilizer products with over 40 years of operational excellence. TIGER®, TIGER 90CR® and TIGER MICRONUTRIENTS® are registered trademarks of Tiger-Sul Products in the United States, Canada and other countries.
